7th March 2011

For the attention of David J Lennon

Subject:

Project Reference Number 1-14-3980/4099
Contract for the Coral and Marine Environment Preservation Study

David,

I am writing this letter to express the appreciation of the Foster Wheeler-SOFCON Consortium for your execution of the above project in Jubail, Saudi Arabia.

The project was issued to ReefBall Australia by SOFCON in September 2009 and completed successfully, and on time, in the spring of 2010. The Coral and Marine Environment Preservation Study was undertaken for our Client RTIP which is the Dow Chemicals-Saudi Aramco Joint Venture undertaking the construction of the largest integrated petrochemical facility in the world.

The Client RTIP has also indicated their entire satisfaction with the ReefBall Australia undertaking which was carried out in the Arabian Gulf through the difficult winter months.

SOFCON is happy to recommend ReefBall Australia to any prospective clients for both their efficient working and professionalism.

Yours sincerely,

Geoff Ivett
