*A celebration of a loved one,
a gift to the sea*

Rest-In-Reef™ is a memorial reef program by Reef Ball Australia, that enables you to purchase a unique and eco-friendly memorial that rests on the seabed generating life for centuries.

Rest-In-Reef™ memorials are made using a 300 yr lifespan marine grade concrete and the patented and most widely used artificial reef unit in the world, the 'Reef Ball', now used in over 56 countries and purchased by the Queensland, New South Wales and Victorian government for the creation of recreational fishing reefs.

Memorial Reef Balls come in a range of sizes with a personalised plaque. The ashes of a loved one may be added to the concrete mix if you wish.

Rest-In-Reef™ is unique. Unlike other memorial options, this option actually creates life and gives back to the sea we love and depend upon so much.
